# Redtronic | Bullitt Series

- **Bullitt Microbar (Lightbar)**

The Redtronic™ Mega-Flash™ Bullitt Microbar is available in single, dual or multi colour models with a variety of additional options. The Bullitt Microbar is primarily designed for mag mount and single bolt fixing methods and is DEKRA speed rated (for both versions) up to 153mph. Battery powered or standard power options.

Variations available, contact us for more information!

- **Bullitt Basic (Lightbar)**

The Redtronic™ Mega-Flash™ Bullitt Basic light bar is ideal for users wanting a low-cost, aesthetically pleasing, reliable, flashing warning signal. It's options are fairly limited and only available from specific distributors. Most lightbars contain a total of 24 x latest generation 3W OSRAM LED's. Amber models are certified to ECE R65 class I. Blue models are certified to ECE R65 class II.

Variations available, contact us for more information!

# Redtronic | Bullitt Series

- **Bullitt Advanced (Lightbar)**

The Redtronic™ Mega-Flash™ Bullitt Advanced lightbar is ideal for users wanting more from their lightbar than the average user and primarily targeted towards blue light users. It utilises the newest technology and one of the most intelligent systems available. The Bullitt Advanced lightbar is crammed with features such as ECE R65 module failure detection and advanced plug & play upgradability to name but a few..

Variations available, contact us for more information!

# Redtronic | Tornado Series

- **Tornado Low Profile (Beacon)**

The Redtronic™ Mega-Flash™ Tornado beacon range has been available for approximately 4 years and has seemingly taken the beacon industry by 'storm'. Redtronic's unique low-profile (LP) tornado revolutionised a seemingly old-fashioned style of product by drastically changing the traditional rigid beacon appearance.

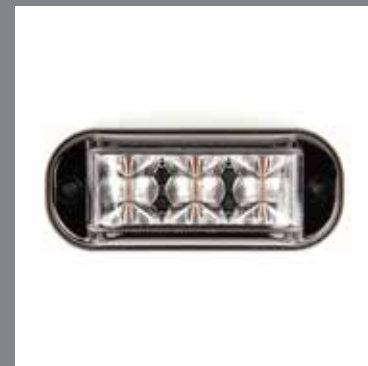

Variations available, contact us for more information!

# Redtronic | Auxiliary

- **BX31 Grille Light**

The Redtronic™ Mega-Flash™ Bullitt (BX) grille lamps are available both in single or multi colour models in 4 specific shapes and sizes. Single colour models are low-cost, reliable and extremely bright due to the impressive use of FX technology

Variations available, contact us for more information!

- **Dash Mount**

The Redtronic™ Mega-Flash™ dash mount is a small, compact and low-cost unit. Primary mounted at the base of the vehicle windscreen to provide an additional front facing warning signal. The Mega-Flash™ dash mount is supplied as standard with three suction cups. The flange positioned on the base prevents light reflecting into the vehicle cab reducing the possibility of dazzling the driver or any passengers.

# Redtronic | Auxiliary

## • Internal Lightbar

The Redtronic™ Mega-Flash™ internal lightbar is primarily designed to be installed in the vehicle cab in front of the visor. The internal light bar is supplied as standard with fixing brackets which slide and secure underneath the visor posts. Available as a permanent fixing or temporary cigarette plug cable.

Variations available, contact us for more information!

## • Night Angel Scene Light (Illumination)

The Redtronic™ Night-Angel scene-light utilises a combination of 'flood' and 'spot' optics meaning the user benefits from both an intense light output as well as an impressive spread. Its impeccable design makes it one of the lowest profile scene-lights available and extremely discrete ... until it's switched on! The main (heat-sink) body is available in standard colours of black, white, red and yellow.
