

Fleet ID presents: iSEE2 - Total Wrap

Total Wrap | Automotive | Gloss

70.xxx Series

The 70.xxx Total Wrap - Gloss series is a range of **supreme quality soft hybrid PVC coloured films**, developed specifically for the vehicle wrapping market. By utilising cutting edge technology in combination with special PVC compounds and high quality pigments, we can offer a film with incredible dimensional stability and **long term durability**. Typical usage includes vehicle graphics and general sign applications that require an exterior service life of 5 - 7 years. The films are suitable for both indoor and outdoor environments. The 100 micron film thickness offers excellent cutting and weeding properties. **The soft hybrid vinyl and adhesive system offer very good conformability and adhesion characteristics which allow the film to be removed without leaving adhesive transfer. The material can be removed under controlled conditions for up to a period of 3 years.**

Total Wrap | Automotive | Carbon Fibre

50.xxx Series

This series offers a carbon fibre pattern where the embossed design has parallel lines. They have been developed for automotive outdoor applications on flat or slightly curved and undulating surfaces. Despite its 160 micron thickness the **product is still extremely flexible** and can be used for general graphics and striping as well as **full body applications on vehicle bonnets, roofs and boots**. The liner has air channel technology which enables **easy and fast application**. The **5 year durable carbon fibre film is designed with a semi-permanent adhesive system, which can be easily removed within one year with minimal adhesive residue.**

- with air channel technology

10.xxx Series

These **quality multi-layered cast films** have a carbon fibre embossed pattern. **They will conform around compound curves, rivets, corrugations and can be applied on to textured surfaces**. Our film is ideal for automotive **applications covering wing mirrors, wheel arches, dashboards and bumpers**. The vinyl can **also be used for general graphics and striping of vehicle bonnets, roofs and boots**. The 135 micron product has enough flexibility and conformability for full vehicle wraps and other long term outdoor applications.

Total Wrap | Automotive | **Speciality**

Speciality Series

The Total Wrap Speciality series contains the latest developments at the cutting edge of the vehicle wrap industry. It consists of high performance cast films such as special pearlescent, metallic, and textured effect films. They are suitable for long-term applications in outdoor and indoor environments. The Speciality series is produced in accordance with specific quality standards and the films are designed for a variety of applications including total vehicle cover, vehicle graphics, signs and decal applications, lasting from 5 - 7 years. The products are produced typically at 1524mm or 1370mm.
